VueStat

Electronic Shelf Label Solution

VueStat

About VueMed

VueMed is a global healthcare IT company dedicated to transforming the healthcare supply chain through groundbreaking technologies that capture point-of-care and clinical inventory transactions data in real time, along with cloud-based data intelligence and analytics.

Our Software as a Service (SaaS) inventory management and data solutions work as a cohesive suite of tools to track and document the usage of medical products, devices and supplies, and to provide savings and additional revenue capture.

About VueStat

VueStat™ is an advanced electronic shelf label (ESL) solution optimized for bin-based and par-level supplies management at the point of use.

VueStat delivers real-time inventory visibility, automates replenishment workflows, and keeps critical product and inventory information accurate and up to date — using dynamic multi-color e-ink displays featuring text, images, QR codes, and more. Seamlessly connected to the cloud, VueStat captures shelf-level activity and turns it into actionable insights and rich analytics that reduce manual tasks, prevent stock-outs, improve supply availability, and drive continuous inventory optimization.

Greater visibility. Smarter replenishment. Optimized inventory performance.

Reduction in manual bin-scanning time	Annual savings from reduced staff travel	Operational metrics tracked across the deployment

Learn more about how MultiCare Transformed Supply Chain Operations with VueStat

How VueStat Works

VueStat transforms bins, shelves, carts, cabinets, and other storage locations — such as procedural areas, clinical storerooms, warehouses — into intelligent, connected inventory environments. Unlike paper labels and traditional shelf screen displays, VueStat enables two-way communication at the point of use: it pushes product updates to the ESLs within seconds, and with a simple button press, users can report stock levels, request replenishment, and confirm fulfillment.

Available in multiple screen sizes, VueStat's electronic shelf labels dynamically display critical product and inventory information, including barcodes, stock status (on-order, back-order, out-of-stock), par levels, approved substitutes, recall notifications, expiration alerts, and other configurable data.

Using scalable Power over Ethernet (PoE) gateways, VueStat connects thousands of ESLs wirelessly to its web-based portal, enabling content to be centrally managed and updated remotely and instantaneously. Its powerful dashboard gives users the critical analytics they need to guide stock optimization decisions and reach their savings and ROI objectives.

Real-Time Information. Greater Control. Supplies Available When and Where Needed.

Alex VanderBroek
Supply Chain Operations Manager, MultiCare Health System
"If somebody marks it under par, it's already on order, and the next day the product shows up — creating trust and confidence in the technology."

Core Features

Stock-Out Prevention
Enables proactive par level adjustments to avoid both stock-outs and excess inventory.

Stock Alerts
Signals low stock and replenishment needs in real time on the label.

Voice-Activated Tracking
Responds to in-room voice commands to flag items and find them instantly.

Availability
Ensures on-hand availability of needed items for procedures, bringing peace of mind.

Description Accuracy
Ensures consistent and accurate display of item descriptions across all locations.

Automated Reordering
Streamlines and automates replenishment and reordering, saving valuable staff time.

Remote Updates
Remotely updates item information and delivers real-time alerts for critical issues, such as recalls.

Patient Care First
Frees up clinicians to focus on patient care, not low-value inventory management tasks.

Why Use VueStat

- **Advanced ESL Technology:** Connects every SKU to our cloud dashboard for real-time updates and powerful analytics to optimize stocks.
- **Safer Patient Care:** Helps ensure safe and critical supplies are available when and where needed for patient care.
- **Smarter Supply Chain:** Automates replenishment, improves inventory visibility, and reduces stock-outs and waste.
- **Empowered Clinical Staff:** Reduces manual tasks and supply searches, giving clinicians more time to focus on patient care.

VueStat By VueMed

No more guesswork or stockouts. Total visibility for peace of mind.

VueStat updates replenishment needs in all locations in real time, empowering supply chain teams to act quickly and ensuring clinicians have what they need for patient care.
