VueMed

VueSync

Cloud-Based Master Catalog

VueSync

About VueMed

VueMed is a global healthcare IT company dedicated to transforming the healthcare supply chain through groundbreaking technologies that capture point-of-care and clinical inventory transactions data in real time, along with cloud-based data intelligence and analytics.

Our Software as a Service (SaaS) inventory management and data solutions work as a cohesive suite of tools to track and document the usage of medical products, devices and supplies, and to provide savings and additional revenue capture.

About VueSync

VueSync™ is a cloud-based master catalog and update service of more than 500,000 SKUs with their associated UDI info that provides 24/7 up-to-date, detailed, and accurate information about medical supplies, products, and devices. VueSync works in real time and ensures accurate data capture and documentation from point of entry to point of care.

Who Benefits from VueSync

VueSync brings value to key hospital constituents and patients by providing a wealth of benefits that start with access to quality data:

- For supply chain, it provides granular visibility and tracking of inventory, as well as reliable forecasting and optimization analyses.
- For clinical departments, it provides redo-free, error-free, and expedited patient documentation at the point-of-care, as well as reliable UDI compliance.
- For value analysis, it enables value-based healthcare and variation control, as well as cross-functional standardized data.
- And for the patient, it improves safety through proactive recall and expiration management, as well as ensures accurate EMR and billing.

Why Use VueSync

Fully-loaded supplies catalog with continuous automatic updates

- Comprehensive cloud master catalog has >500,000 SKUs and clean product definitions and details: Turnkey solution with no database building for the user
- One-step, complete access to reliable item definitions for documentation that feeds directly into any clinical or ERP system: Easy, efficient access to product data
- Master catalog is continually and centrally updated by VueMed: Users never need to worry about keeping up or avoiding errors or gaps

No burden on hospital staff — no manual entries or upkeep

- Mitigation of risk due to inaccurate or incomplete patient records
- Increase in staff efficiency and satisfaction
- Improved quality of care delivery and process throughput

Complete and accurate data capture for each item

- Real-time documentation of supplies in one swift step
- UDI compliance with expiration and lot/serial number data
- Complete dataset for easy recall and expiration management
- Accurate billing that maximizes revenue capture

VueSync By VueMed

One source of truth. Systems data always in sync.

VueSync provides clean standardized SKU data for your clinical documentation system, linking to your ERP for full interoperability.
