VUEMED

ABOUT VUEMED

VUEMED was founded in 2008 with the vision of transforming the healthcare supply chain into a value chain, with tools that promote greater transparency and provide more comprehensive and accurate data to help achieve higher levels of efficiency, savings, revenue capture, and patient care. Our suite of inventory optimization solutions utilizes both barcode scanning and RFID technologies for data capture, and enables hospitals to track, manage, and document all usage of clinical supplies and devices throughout their supply chain and across healthcare facilities. Our solutions are SaaS-based and include a Value-Added Optimization Program oversight where, under the guidance of in-house analysts, VUEMED provides the on-going analytical support to suggest a series of improvements and best practices to achieve supplies-related cost savings and operational efficiencies.

GUARANTEED ROI

- VUEMED guarantees a minimum ROI of 200% in the first 12 months post-implementation, which typically carries on annually thereafter.

- We achieve this ROI by offering excellent customer service as well as ongoing technical and analytical support in order to promote user empowerment and ensure continuous improvements within the organization.

- VUEMED's reporting tools and analytics are guaranteed to uncover and capitalize on a multitude of savings opportunities.

- Our inventory optimization program institutes best practices in daily operations and provides a proven road map to attaining targeted improvement objectives.

>200% ROI

KEY BENEFITS

1 Cloud catalog of >500,000 SKUs maintained and updated daily for accurate supplies documentation and patient records

2 Elimination of billing errors and increased revenue capture

3 Instant access to reliable, real-time, results-oriented data intelligence

4 Effective expiration prevention and recall management

5 Optimization of inventory composition to meet clinical needs

6 Greater staff productivity and physician satisfaction

7 Cost-effective and highly scalable implementation

8 Affordable monthly subscription model

CATALOG MANAGEMENT SOLUTION

VUESYNC

VueSync™ is a Cloud-based master catalog and update service of hundreds of thousands of SKUs, with their associated Device Identifiers (DI) across multiple clinical service lines, that provides real-time, accurate item data. VueSync powers all of VUEMED's solutions but is also available as a stand-alone offering.

CLINICAL INVENTORY MANAGEMENT SOLUTIONS

VUETRACK

VueTrack™ is an advanced barcode scanning software and Cloud-based technology that provides hospitals with the ability to track, document, and control clinical products and supplies from their delivery on-site to the point of care.

VUETRACK RF

VueTrack-RF™ is the RAIN RFID-based data capture version of VueTrack, tracking medical devices and supplies in real time with 99.5% accuracy. It uses Ultra High Frequency (UHF) passive Gen 2 RFID antennas and tags compliant with global standards (GS1 EPC) and the FDA's UDI regulation.

VUETRACK mobile

VueTrack-Mobile™ is our hand-held, dual-mode barcode scanning/RAIN RFID inventory tracking solution, designed to rapidly perform a variety of inventory counting and auditing tasks on-the-go.

SUPPLY CHAIN MANAGEMENT SOLUTIONS

VUECOUNT

VueCount™ is a turnkey mobile solution that allows users to manage and audit their inventory, from PPE and other low cost/high velocity med-surg items to high cost specialty procedure supplies and implants.

VUEBIN

VueBin™ is a Cloud-based RAIN RFID-powered Kanban inventory management system that automates the management of all med-surg or typically high velocity and inexpensive or non-chargeable supplies.

VUETRACK UDI

VueTrack-UDI™ is our RAIN RFID tag-encoding solution that registers and prints RFID tags, compliant with the FDA's UDI regulation, while recording each item in the Cloud to enable the IoT of medical supplies and devices.

PERIOPERATIVE SOLUTIONS

VUESURG

VueSurg™ is our application for managing, tracking, and documenting all surgical instruments throughout their utilization cycle, from sterile processing to patient procedures.

VUETRAY

VueTray™ is our touchscreen-enabled solution for preparing, managing, and documenting orthopedic implants and trays through sterile processing, all the way to the point of care.

VUECARD

VueCard™ is our mobile case preparation app that organizes and manages case picking, reports on case cart fulfillment status, and tracks requested supplies from preference card/product list to case cart all the way to the patient procedure.
